

## ◁ TO THE TRADE ▷

In offering this machine to the trade, we would state that heretofore we have only built this Press to fill special orders for printing Yardsticks. We believed there was a market for such a machine, if constructed to do general work in the Novelty Goods line, as well as printing Advertising Signs. Acting upon this idea, we have lately constructed this Press from a new design, it being much heavier, has better distribution, and is easier to operate.
